

4-Antibody AG is a biopharmaceutical start-up company active in the field of development and optimization of therapeutic antibodies for the treatment of human diseases.

For our Research and Discovery team at our Head Office in Basel (CH) we are currently looking for a

Scientist (PhD) at 100% employment

with a strong background in **Immunology**, **Cell Biology** and **Molecular Biology**.

Prospective candidates should hold a PhD (or MD with equivalent research experience) with at least 2-3 years of post-doctoral experience in an academic or biotech-industry setting. Candidates should have a **broad understanding of immunology**, in particular **human and mouse lymphocyte development**. In addition, an expertise in **tumor biology** would be advantageous.

Excellent English (spoken and written / preferably native speaker) is mandatory. A good working knowledge of standard office application software (Excel, Word, Powerpoint) is expected, as well as knowledge of various bioinformatics applications.

If your profile meets the requirements mentioned above, and if you are interested to work in a dynamic and growing life-science company, please submit your application electronically to application.basel@4-antibody.com (subject: Scientist-0807)
